IDEA TITLE

SMART INDIA HACKATHON 2026

THE PROBLEM

Citizens, PRIs, and ULBs face everyday civic and social problems with no structured channel to reach people who can solve them. Universities want real, unsolved problems for research but lack a discovery mechanism. Industry has CSR budgets but no vetted pipeline of verified problems. Government has no single dashboard to track who's solving what — or whether it worked.

OUR SOLUTION

- **Report** → citizen/PRI/ULB/govt submit problem, photo+doc+geo proof attached.
- **AI check** → validate info enough, tag category, catch dupes.
- **Match** → AI pair problem with best university (faculty expertise fit).
- **Solve** → faculty mentor + students propose fix. Industry can fund/mentor/collab.
- **Track** → govt dashboard watch submit-to-done. Impact logged.
- **Close loop** → citizen confirm fix actually work.

UNIQUE SELLING POINTS

🔍 **AI-Powered Semantic Duplicate Detection**	🎯 **Faculty Expertise-Based Auto-Matching**	👨‍🏫 **Mandatory Faculty Mentorship**
📡 **Offline-First Submission with Auto Sync**	🔒 **Role-Based Location Privacy Tiers**	✅ **Citizen Feedback & Resolution Confirmation**

HOW OUR SOLUTION SOLVES THE PROBLEM

- **Transparent Reporting** — Citizens get one channel to report problems and track them to resolution
- **AI Validation & Deduplication** — Nothing gets lost, ignored, or duplicated
- **Smart University Matching** — Problems auto-route to the right expertise, closing the visibility gap
- **Verified Industry Pipeline** — Funding and mentorship go to vetted problems, ending blind CSR spending
- **Live Government Dashboard** — Every problem tracked from submission to completion, state-wide
- **Citizen Feedback Loop** — Confirms the fix actually worked, restoring accountability and trust

FEASIBILITY AND VIABILITY

SMART INDIA HACKATHON 2026

FEASIBILITY

- **Technology Readiness —** Built entirely on open-source, proven stacks with no paid API dependency, keeping scope realistic for the hackathon timeline.
- **Lightweight AI —** Rule-based similarity checks and simple domain-tagging avoid heavy ML infrastructure while still meeting PS requirements.
- **Role-Based Access —** A defined authorization matrix per endpoint keeps the system scoped and secure without extra complexity.
- **Operational Fit —** Fits into existing university project/internship cycles, no new administrative process needed — just a new intake channel.

VIABILITY

- **Trust Dividend** — Transparent dashboards and a tamper-evident audit trail build long-term confidence among citizens, universities, and industry.
- **Institutional Stickiness** — A continuous pipeline of real problems keeps universities and industry engaged well beyond a one-off MoU.
- **Human-in-the-Loop** — Government Admin retains override control at every step, so the system augments rather than replaces judgment.
- **Policy Synergy** — Direct alignment with Digital India, NEP 2020, and state innovation missions ensures smoother adoption.

POTIENTIAL IMPACTS

- Low citizen trust/adoption
- False or spam submissions
- University/industry disengagement over time
- Sensitivity of citizen location data
- Vague or incomplete reports
- Duplicate report flooding

STRETIGIES TO OVERCOME

- Multilingual voice + text reporting widens citizen access
- Rate limits, input sanitization, and file checks block spam
- Impact dashboard + citizen feedback loop keep contributors engaged
- Tiered location privacy (precise/district/public) with citizen opt-in
- AI completeness check prompts for missing who/what/where/impact before submission
- Similarity-based dedup collapses near-duplicates into Support votes

REVENUE SOURCES

- Govt Licensing & Setup: Annual licensing for dept dashboards/analytics, one-time deployment cost per district rollout.

- Road to Profitability:
- Year 1 → Pilot in 1–2 districts, CSR/state innovation grant funded
- Year 2 → State-wide rollout under Higher & Technical Education dept budget
- Year 3 → Licensing model to other state governments via NIC/state IT depts

IMPACT AND BENEFITS

SMART INDIA HACKATHON 2026

ECONOMIC BENEFITS

- **Cost Efficiency** — Fully open-source, zero-license stack, estimated 40-50% lower total cost vs. a custom-built proprietary alternative.
- **Fund Routing Efficiency** — Centralized dashboard enables dynamic CSR/govt fund allocation, cutting misallocated or idle budget by an estimated 25-30%.
- **Reduced Duplication Waste** — Semantic dedup collapses near-duplicate reports, cutting redundant admin review effort by roughly 30%.
- **Scalable Economics** — Per-district onboarding cost drops as more universities and industry partners join the shared matching pool.

SOCIAL BENEFITS

- **Citizen Empowerment —** Every voice heard and tracked to resolution, not lost in a queue.
- **Academic-Industry Bridge —** Real problems replace theoretical projects, connecting classrooms to actual communities.
- **Transparency —** Public dashboards + traceable funding rebuild trust between citizens, institutions, and government.
- **Faster Civic-to-Solution Cycle —** Structured routing shrinks the gap between "problem reported" and "work begins."

IMPACT ON THE TARGET USERS

CITIZENS

- Transparent tracking from report to resolution
- Local-language, offline-first reporting for rural access

STUDENTS & FACULTY

- Real-world projects replace generic academic assignments
- Mentor-assigned research builds a genuine portfolio

UNIVERSITIES

- Continuous curated pipeline of live problems, no manual outreach needed
- Track record boosts institutional visibility and funding pull

INDUSTRY / CSR PARTNERS

- Vetted, verified problems replace informal CSR guesswork
- Traceable funding trail proves measurable ROI

GOVERNMENT

- Single live dashboard across domains and districts
- Override control prevents stalled or misrouted projects

IMPORTANT INSTRUCTIONS

SMART INDIA HACKATHON 2026

Please ensure below pointers are met while submitting the Idea PPT:

1. **Kindly keep the maximum slides limit up to six (6). (Including the title slide)**
2. **Try to avoid paragraphs and post your idea in points /diagrams / Infographics /pictures**
3. **Keep your explanation precise and easy to understand**
4. **Idea should be unique and novel.**
5. **You can only use provided template for making the PPT without changing the idea details pointers (mentioned in previous slides).**
6. **You need to save the file in PDF and upload the same on portal. No PPT, Word Doc or any other format will be supported.**

Note - You can delete this slide (Important Pointers) when you upload the details of your idea on SIH portal.
